

The MarketGrader Australia Small Cap 60 Index consists of 60 fundamentally sound companies that are domiciled in Australia or New Zealand, whose shares are listed on ASX (Australia Securities Exchange), and that fall within MarketGrader's mapping of small cap companies in the Australian equity market. The Index constituents are selected based on the strength of their fundamentals as measured by the MarketGrader Overall Grade (0-100), the MarketGrader Earnings Yield Score (0 to 100), and each company's market capitalization rank.

Index Rules

Investable Universe

All companies in MarketGrader's Australia small cap universe with a minimum three-month average daily trading volume of at least USD 1 million on the Index selection date. MarketGrader defines its Australia small cap universe as those companies ranked 101st to 300th by free float market capitalization listed on ASX (Australia Securities Exchange). The investable universe includes companies that are domiciled in Australia and New Zealand.

Selection Methodology

MarketGrader calculates daily 24 financial performance indicators for all companies under coverage across four fundamental categories: Growth, Value, Profitability and Cash Flow. These 24 indicators are aggregated into a final MarketGrader Overall Grade that ranges from zero (0) to one hundred (100). Additionally, MarketGrader also calculates a proprietary Earnings Yield Score, which combines every company's Earnings Yield with forward earnings estimates, and ranks all companies in the underlying investable universe based on a combination of all earnings yield-related metrics.

On the Index's rebalance selection date, MarketGrader excludes from the underlying Investable Universe all companies with a MarketGrader Score below 40. From the remaining companies, it then selects the 60 highest MarketGrader Earnings Yield Scores, which then become the Index's constituents for the following six-month period.

Index Selection, Reconstitution and Rebalance Dates

The Index is reconstituted and rebalanced after the close of trading on ASX (Australia Securities Exchange) on the third Friday of March and September. The Index constituents are selected on the Tuesday of the previous week, or ten (10) calendar days prior to the reconstitution and rebalance date.

Constituent Weighting Methodology

All Index constituents are equally weighted at each semi-annual reconstitution and rebalance.
